02184				REPORT EXCERPT - WHITE BEAR TOWNSHIP DUMP RESPONSIBLE PARTIES	PAGES 4-3 AND 4-4 IDENTIFY REDARW, WHIRLP, AND REYMET ARE IDENTIFIED AS RESPONSIBLE PARTIES BY MPCA UNDER MINNESOTA STATUTES. THE REPORT LISTS SIX COMPANIES THAT HAD WASTES HAULED TO THE SITE, AND THAT REDARW WAS THE ONLY HAULER TO THE SITE. THE DOCUMENT IDENTIFIES THE MATERIAL WHIRLP AND REYMET SENT TO THE SITE.	WHIRLP, REDWARW, REYMET

was conducting its activities at the site. According to the customer list submitted by Krawczewski, the wastes of the following companies were hauled to and disposed of at the site (26).

- (1) Rayette Fabergé (aka Faberge Incorporated)
- (2) Glastech Corporation
- (3) Acrylglas Corporation
- (4) Reynolds Aluminum (subsidiary of Renolds Metals Compnay)
- (5) Whirlpool Corporation
- (6) Fiberglass, Inc.

There were no waste haulers, other then Red Arrow, that used the site for disposal of industrial or commercial waste. Red Arrow has been identified by MPCA as a responsible party under Minnesota statutes (26).

4.2.2 Sam Hanes

In his response to the MPCA information request, Richard Krawczewski indicated that Sam Haines, Ethel Haines and Bob Haines operated the site as a burning dump (27). These names do not appear in the St. Paul telephone directory. However, a Sam Hane with an address of 881 East Highway 96, White Bear Lake, does appear in the directory. His residence is located adjacent to the access road to the White Bear Township Dump site (this in the property described in the title search as being owned by Ethel V. Hane 37).

4.3 Generators

4.3.1 Whirlpool Corporation

The St. Paul Division of the Whirlpool Corporation negotiated a contract with the Red Arrow Waste Disposal Company for waste disposal for the period July 1, 1972 to June 30, 1973. Under the contract, all waste materials were to be removed from the Whirlpool facilities in St. Paul, including the disposing of paint sludges, hydrocarbon solvents, oils and greases, and

synthetic adhesives. During the period July 1, 1972 to January 17, 1973, materials were placed in 55 gallon steel drums and disposed by Red Arrow at or near the White Bear Township Dump. Estimated quantities of materials that were required to be disposed of per month included (28):

1. Hydrocarbon solvents and reducers - 200 gallons
2. Paint solids (both wet and dry) - 800 gallons
3. Oils and greases - 2,000 gallons
4. Synthetic adhesives - 50 gallons

Whirlpool Corporation (Headquarters located at Benton, Michigan) has been named a responsible party by MPCA under Minnesota statutes because it owned or possessed hazardous substances and arranged through agreement for transportation and disposal of the hazardous substance found at the site. Whirlpool has participated in response actions as requested by MPCA (29).

4.3.2 Reynolds Metals Company

Reynolds Aluminum Company (a subsidiary of Reynolds Metals Company) operated a facility in the city of White Bear at 1699 Ninth Street Lake from 1963 to 1969. Red Arrow kept a container at the Reynold's facility which was used for disposal of essentially all trash and other solid waste materials. Hazardous wastes were generated as a result of coating operations, in which decorative and protective coatings were applied to the surface of aluminum beverage cans. Waste coatings, solidified coating resins, and cleanup solvents were collected in drums and placed in the Red Arrow container for disposal. The wastes from this operation consisted mostly of epoxy and vinyl epoxy resins, methyl ethyl ketone (MEK), and methyl isobutyl ketone (MIBK). Other wastes included hexane, mineral spirits, isopropyl alcohol, various nonhalogenated solvents used in cratings and some inorganic pigments. Reynolds estimated that the above wastes were generated at a rate of several drums per week (30).
